Below is the “Bill of Materials” (BOM) for this execution of the Disclosure Avoidance System. Each file name ending with `.py` indicates a python file that was imported into the python interpreter’s memory footprint on the driver node at the time that this certificate was generated. The other files (e.g. files ending `.md` and named *Makefil*) are files that are included in the zipfile that was distributed to the worker nodes and included with the source code release associated with the data release.
